POOL FILLING

If a consumer desires to fill or add water (300 gallons or more) to a swimming pool, the consumer must contact the Authority or its operator to obtain the written permission as to the time, date and amount of water which the consumer may use to fill or add to the pool and any restrictions that may be placed upon the water service at that time. If the consumer violates this provision, the water service to the property may immediately be terminated without prior notice and in addition, the violator shall be subject to the payment for the cost for termination or restoration of service, the actual or estimated amount of water used and a penalty of \$300 for damage to the water system. For more information, consumers may either contact the Municipal Office at 570-758-3615 or the plant operator at 570-274-0554 or you may send a request through our website under the customer service heading on the left of the webpage. If you are not sure how much water your pool holds, under the “fill a pool” heading in the drop down box in the customer service section, there is place to calculate the amount of water needed.
